PROFESSIONAL SUMMARY

Results-driven AI/ML Engineer experienced in developing AI solutions using Python, Machine Learning, NLP, LLMs, and RAG. Passionate about building scalable, production-ready AI applications and solving real-world problems.

TECHNICAL SKILLS

Programming: Python, SQL

Machine Learning: Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation, Scikit-learn

Deep Learning: TensorFlow, PyTorch, Keras

Natural Language Processing: NLTK, Transformers, Hugging Face Transformers, Sentence Transformers

Generative AI: LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, Embeddings, Vector Databases

Data Analysis & Visualization: NumPy, Pandas, Matplotlib

Databases: MySQL, Vector Databases

Tools & Platforms: Git, GitHub, Docker, Jupyter Notebook, Google Colab, Visual Studio Code (VS Code), Kaggle

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

PROFESSIONAL EXPERIENCE

AI/ML Intern

Rapsora Technologies Pvt. Ltd.

February 2026 – Present

Pre Placement Offer (PPO) Received

- Developed AI-powered applications using Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG).
- Developed an OCR-based handwritten text recognition system for the e-commerce application.
- Provisioned and managed SharePoint Lists, Document Libraries, and permissions for structured data storage.

Python Intern

Oasis Infobyte (AICTE OIB-SIP)

May 2024 – June 2024

- Developed a voice assistant using Python with Speech Recognition and Text-to-Speech (TTS) to execute voice commands and automate basic tasks.

PROJECTS

EmoSens – Hybrid Text-Based Emotion Detection

[GitHub](#)

- Developed a hybrid emotion detection model combining TF-IDF and lexicon-based feature extraction with XGBoost and a RoBERTa classifier using a soft voting ensemble.
- Performed text preprocessing, feature engineering, model training, and evaluation using Scikit-learn, XGBoost, and Hugging Face Transformers.
- Built an interactive application for real-time emotion prediction and emotion analysis.

Chat with Code

[GitHub](#)

- Developed an AI-powered assistant that enables users to chat with GitHub repositories using natural language.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline by indexing repository code, generating embeddings, and retrieving relevant code context.
- Integrated LangChain and Large Language Models (LLMs) to explain code, answer technical questions, and simplify codebase navigation.

SortList

[GitHub](#)

- Developed an AI-powered candidate shortlisting system using Sentence Transformers for semantic resume-job matching.
- Enhanced candidate evaluation by integrating GitHub repositories and LeetCode profiles to assess coding skills, projects, and problem-solving ability beyond resumes.
- Automated candidate ranking by combining semantic resume matching with developer profile insights for more objective hiring decisions.

EDUCATION

Chhatrapati Shahu Ji Maharaj University

Bachelor of Technology – Information Technology

2022 – 2026

CGPA: 8.16 / 10

ACHIEVEMENTS & CERTIFICATIONS

- Secured **First Prize** in the **Built with Framework Hackathon**.
- IBM Data Science Professional Certificate** (IBM & Coursera)
- Decode Python with DSA** (Physics Wallah)
- Machine Learning** (Tutoredude)
